

Dash Rides Toronto — Demo Guide

iTAP Cab & Transport Module by ZashX

Quick Overview

Dash Rides Toronto is a demo cab/transport business built on the iTAP platform. This guide walks you through the admin portal (dispatch, fleet management) and driver app to explore the full ride-hailing workflow.

Login Credentials

Owner / Admin Portal

Field	Value
URL	itap.zashx.com/partner/login
Email	demo@zashx.com
Password	Demo2026!
Select Business	Dash Rides Toronto

After login, you'll see the cab-specific admin dashboard with trip stats, driver status, and quick actions.

Driver App

Driver	Email	Password	Vehicle
Ahmed Hassan	driver1@demo.itap	Demo2026!	Toyota Camry 2023 (White)
Raj Patel	driver2@demo.itap	Demo2026!	Honda CR-V 2022 (Black)
Maria Santos	driver3@demo.itap	Demo2026!	Dodge Caravan 2021 (Silver)

Field	Value
Driver Login URL	itap.zashx.com/drive/driver/login

What to Check in the Demo

1. Admin Dashboard

- **Today's Trips** — total ride count for the day
- **Today's Revenue** — total fare revenue
- **Online Drivers** — how many drivers are currently on duty
- **Active Trips** — trips currently in progress
- Quick action buttons: Dispatch, Trips, Drivers, Vehicles

2. Dispatch Board (Live)

- Real-time view of all active trips

- Status tabs: Searching, Assigned, In Progress
- Assign available drivers to pending rides
- Cancel trips with reason
- Auto-refreshes every 10 seconds

3. Driver Management

- View all registered drivers with status (Online / Offline / On Trip)
- See driver details: license, vehicle assignment, rating, total trips
- Add new drivers from existing staff members
- Edit driver profile (license, vehicle, commission rate)

4. Vehicle Fleet

- Full fleet inventory with plate, make, model, year, color
- See which driver is assigned to each vehicle
- Add / edit / remove vehicles

5. Zones

- Service area configuration (Downtown, Airport, Suburbs, etc.)
- Zone-based surcharges (e.g., Airport Fee — flat \$5.00)
- Toggle zones active/inactive

6. Fare Rules

- Pricing by vehicle type (Sedan, SUV, Van, Luxury)
- Base fare, per-km rate, per-minute rate, booking fee
- Peak hours multiplier, night rate multiplier
- Waiting charges, cancellation fees
- Minimum fare thresholds

7. Promo Codes

- Create percentage or flat discount codes
- Set validity dates, usage limits, minimum fare requirements
- First-ride-only promotions
- Track usage count

8. Support Tickets

- View customer/driver complaints
- Filter by status (Open, In Progress, Resolved)
- Link tickets to specific trips
- Add resolution notes

9. Settings

- General business settings (name, currency, timezone)
- Trips & Dispatch configuration (auto/manual dispatch, radius, timeout)

Demo Data Included

Data	Count	Details
Drivers	3	Ahmed, Raj, Maria — with ratings and trip history

Vehicles	4	Camry, CR-V, Caravan + 1 unassigned Hyundai Ioniq
Zones	4	Downtown Core, Pearson Airport, North York, Mississauga
Fare Rules	4	Sedan, SUV, Luxury, Accessible — each with full pricing
Promo Codes	3	FIRST50 (50% off), AIRPORT10 (\$10 off), WEEKEND20 (20% off)
Trips	4+	Mix of completed and active trips
Support Tickets	1	Sample billing dispute

Coming Soon (Not in This Demo)

Google Maps Integration

- Live driver tracking on map
- Route visualization (pickup to dropoff)
- ETA calculations
- Geofenced zone boundaries on map
- Heatmap of ride demand

Maps integration requires Google Maps Platform API key configuration — will be activated based on brand requirements.

Customer / Rider App

- The customer-facing ride booking app will be provided separately
- It will be **brand-specific** — customized with your company name, logo, colors, and branding
- Features include: ride booking, fare estimate, driver tracking, ride history, ratings, promo codes, payment
- Detailed discussion on customer app scope, design, and timeline will follow

Driver Mobile App

- Dedicated mobile experience for drivers
 - Accept/reject ride requests, navigation, earnings dashboard
 - Currently, driver login is available at the web URL above
-
